During the analysis processes,i discovered the following.

1.)The result above shows that there are missing values in Age, Cabin and in Embarked.

2.) Majority 1st class passengers Survived while only half of the 2nd class passengers Survived

3.) From the Dataset there were more women who survived

- survival - Survival (0 = No; 1 = Yes)
- class - Passenger Class (1 = 1st; 2 = 2nd; 3 = 3rd)
- age - Age
- sibsp - Number of Siblings/Spouses Aboard
- parch - Number of Parents/Children Aboard
